2.0 Introduction and Statement of Work

2.1 Agency Background and Description

The Authority provides a variety of public transportation services in Southeastern North Carolina. The Authority’s service area is 199 square miles, concentrated within New Hanover County, with service to outlying areas including Carolina Beach. Wave Transit has authority to

serve an area up to 30 miles outside the limits of New Hanover County (County), as extended from time to time and in years prior, services have extended to portions of Southern Pender County and Northern Brunswick County. The Authority is also under contract with the University of North Carolina Wilmington (UNCW) to provide public transportation services in and around the university.

The Authority is governed by a nine-member Board of Directors appointed by the New Hanover County Commissioners and the Wilmington City Council. The Authority currently provides directly operated ADA complementary Paratransit and contracted fixed route services. The Authority’s fixed-route service fleet is comprised of, **twenty-one (21) 35ft Gillig low floor buses**, **two (2) 28ft Hometown Trolley replicas** and **fifteen (15) 28ft Light Transit Vehicle (LTV) shuttles**. The project scope will be limited to vehicles utilized only for fixed-route services, detailed above.

2.2 Project Summary

The Authority seeks to install an Automated Passenger Counter (APC) System to improve customer service, record keeping and reporting compliance, accountability, and overall effectiveness of the transit service. System data will be used to inform agency planning functions to increase service efficiencies.

Stop level boardings for NTD sampling requirements are currently collected manually, and fixed-route passenger trips are captured through Genfare farebox technology. Ridership statistics for fixed-route transportation services for fiscal years 2018 thru 2020 are illustrated below:

Year	Fixed Route Bus	Port City Trolley	UNCW Seahawk Shuttle
FY18	889,137	37,719	379,243

The proposer shall provide a test plan and subsequently work with the Authority to define successful acceptance criteria and schedule for both test phases.

Test Variances

Variance priorities, consistent with the following, shall be agreed upon between the Authority and the proposer:

- | | |
|---------------------------------|--|
| Priority 1: Critical | A variance that impacts safety or prevents critical system functionality. These may prevent further test execution until resolved. |
| Priority 2: Major | A functional or performance deficiency that must be corrected to meet the specification, but otherwise does not impede the primary system functions and does not present a safety concern. |
| Priority 3: Minor | A minor functional or performance deviation or documentation error that has little or no operational impact. |
| Priority 4: Scope Change | Request for an enhancement that was not in the original scope. |

The vendor shall track all variances and document actions taken to correct each variance. Sufficient information shall be provided to enable Authority representatives to determine the

need for retesting the function, for testing interaction with any previously tested function, and for updating appropriate documentation, as a result of the corrective action.

Each variance shall be addressed by the vendor and closed when representatives from both parties acknowledge, through signature, correction of the variance.

All **Priority 1 and 2** variances found during the sample fleet testing shall be corrected by the vendor and approved by the Authority. Variances must successfully be corrected before System Test Acceptance, or phase two testing can be achieved.

The Authority may choose to waive these restrictions in specific instances, depending on the nature of the variances. **Priority 3** variances may be addressed in the warranty period, at the discretion of the Authority.

Warranty (Required)

Contractor shall propose a Warranty of no less than one (1) year for all installed equipment. Contractor shall provide a copy of Warranty that will be provided.

At a minimum, the following data shall be transferred between the vehicles and the fixed end:

- Automatic Passenger Counter data upload from vehicles

The WLAN access point coverage shall be sufficient to support daily data transfers of performance data from the fleet and updates to the fleet without operational impact to the Authority.

The WLAN access points shall also support the Wireless Protected Access 2 (WPA2) security standard or better and shall meet or exceed the following environmental capabilities The company shall provide a WLAN software solution that automatically transfers performance data daily from the fleet, without human interaction

The proposer shall provide accompanying WLAN software in which Authority personnel can distribute data and software updates to the fleet. Authority personnel will manually select or assign the data/software to be updated, assign it to a bus, group of buses or all buses, set an activation date and time and press go.

The update process must recover from point of disconnect. The intent of this requirement is to prevent retransmitting the part of an update that was partially transmitted prior to the vehicle disconnecting from WLAN.

The WLAN software must ensure that no data is deleted prior to successful transmission and must track and report the status of the update to each individual vehicle. Software shall track and report the transmission of all performance and log data from the fleet to the fixed end.

Router (Optional)

The proposer *may* propose a router capable of cellular or WLAN as an option. Router must be compatible with the latest Verizon cellular network.

The Authority will be responsible for the cost of cellular data services up to 250 MB or 50MB shared plan depending upon the vehicle type. Projected revisions to the data plans resulting from this add-on option must be communicated and captured in the pricing schedule.

Proposed solution should address wireless downloads of daily APC data from units on the yard. Other technology integration proposals can be included.

The Owner, by written notice, may terminate this contract, in whole or in part, when it is in the best interest of the project. If this contract is terminated, the Owner shall be liable only for payment under the payment provisions of this contract for services rendered before the effective date of termination.

The Owner may terminate this contract in whole or in part, for the Owner's convenience or because of the failure of the Contractor to fulfill the contract obligations. Upon receipt of the notice, the Contractor shall (1) immediately discontinue all services affected (unless the notice directs otherwise), and (2) deliver to the Owner all equipment (property of Owner), data, drawings, specifications, reports, estimates, summaries, and other information and materials accumulated in performing this contract, whether completed or in process. 5.18.5 Rights and Remedies - The duties and obligations imposed by the Contract Documents and the rights and remedies available thereunder shall be in addition to and not a limitation of any duties, obligations, rights and remedies otherwise

imposed or available by law. No action or failure to act by the Owner, Architect or Contractor shall constitute a waiver of any right or duty afforded any of them under the Contract, nor shall any such action or failure to act constitute an approval of or acquiescence in any breach thereunder, except as may be specifically agreed in writing.

5.19 Protest Procedures

To ensure that protests are received and processed effectively the Purchaser shall provide written bid protest procedures upon request.
